

**LONG TERM RESISTANCE UP TO 150 °C**

Application example

SOFT RUBBER LINING WITH EXCELLENT  
THERMAL RESISTANCE

# KERABUTYL HT

The BIIR-based membrane can withstand temperature loads up to 150 °C without additional protective layer.

## Thickness

- Standard 4 mm
- On request 3-6 mm

## Main Features

- Temperature resistance up to 150 °C
- Excellent adhesion with furan- and phelon resin systems (cement / adhesive)
- Very good chemical resistance
- Very good adhesion (break in the rubber lining) on
  - ▶ lead
  - ▶ steel
  - ▶ stainless steel (Alloy 59 / Inconel)

## Scope of application

- Raw gas inlet duct
- Replacement for titanium and lead
- Quencher
- Heat exchangers
