Premium Refractories at AISTech 2017

The latest innovations were presented by STEULER KCH at AISTech, a trade fair which was held in Nashville (USA) in May 2017. Amongst other things the Highlights included a new generation of magnesia-carbon bricks with the purpose of further improving the manufacturing output and processes of its customers. In addition to this, the focus was on innovative bottom casting materials and formats that significantly improve safety during casting and the homogeneity of the resulting steel ingots. Achieving such optimisation is the result of a coordinated package of services involving analysis, simulation and engineering prior to the development and production of the employed materials.

Due to the strong growth experienced in the steel industry in particular, the Steuler Group of companies has in recent times substantially increased its production capacity in Germany and is now well placed to meet the rising global demand for premium products, including in the US-American market.

STEULER-KCH GmbH is considered as an innovative German manufacturer of premium refractory materials, which has steadily developed and expanded its portfolio of products for the steel industry in recent years. Amongst other things refractory lining materials for every zone of blast furnaces and direct reduction plants, transport ladles, arc furnaces but also steel teeming systems were manufactured and supplied to customers around the world.
