Refractory linings for steel ladles and electric arc furnaces: Steuler presents complete concepts

World-leading experts will meet in June 2019 for GIFA and METEC, the international trade fair for metallurgy, cast steel and steel production. The refractory specialists of Steuler Refractory Linings will also be represented in Düsseldorf - with an exhibition stand that surprises. Together with the Spanish subsidiary TECRESA (Tecnicas de Refractarios) - with 300 employees Spain's market leader in the field of refractory installations - Steuler offers exciting insights into the entire portfolio of the business unit Refractory Linings.

Based on the new developments and portfolio additions of recent years, Steuler Refractory Linings will for the first time present a complete concept for the lining of steel ladles and electric arc furnaces. In addition, the market leader in the field of ingot casting systems for bottom teeming presents innovative designs and solutions that facilitate and qualitatively enhance the process of ingot casting. This year's trade fair appearance will be rounded off by the offer of engineering services, casting simulations and installation.

Steuler Refractory Linings is one of the leading innovation and market leaders in the field of refractory systems. The product range includes both shaped and unshaped refractory products. Whether dense thermally, chemically and mechanically resistant or lightweight, insulating materials - as a full-service supplier, Steuler Refractory Linings supplies all the materials required for a refractory lining, including complete anchoring systems, engineering and installation.

The Steuler Group operates worldwide in the divisions of Linings, Plant Engineering / Environmental Technology and Tiles. Founded in 1908, the medium-sized company today employs more than 2,600 people at 25 international locations.
